[A Grand Alliance To Overcome The Elite Betrayal Of America](#)

For the first time in history, the ruling class of a powerful nation has abandoned its fellow citizens. What is happening in America today is more than a return to feudalism, although the new economic model into which we're being herded is correctly compared to feudalism. The reality is actually much worse: America's elites view ordinary citizens as no longer necessary. Because of globalism, they are replaceable. Because of automation, they are superfluous. Because of environmentalism, they are unsustainable.

[Is America Out of Control? The Agenda To Destroy America](#)

Look around, America and much of the world is in chaos. And it's all since the infamous election of 2020...the election that took strong American leadership out of the world arena, deposited a puppet, and taught Democrats how to win an election...the election that allowed the Left to finish the job of destroying America...four years late.

[Bible believers prepared Israel for statehood; then we stopped listening to God.](#)

Evangelical Christian preachers and politicians were the prime influence on British government policies leading to the Balfour Declaration and the subsequent internationally-backed Mandate to prepare the Jewish people for statehood. It turns out your favorite dictators are graduates of the WEF junior program such as Jacinda Ardern, Justin Trudeau and more. Is it any wonder than that we are seeing similar agenda items across the globe such as transhumanism, 15 minute cities, the end of combustion engines, climate lockdowns, digital currency and the elimination of cash? [FedNow... And What's Next?](#)

“Come July, the Fed will involve itself **directly** in the affairs of Americans, via **Fed Now** – a chirpily named etiolation of the “Fed’s” manipulation of the nation’s money supply. The object now isn’t manipulation as much as it is habituation. To “federal” control over what you are allowed to buy and sell with the **digital money it controls**. **FedNow is the Beta version of what is meant to become the**

Fed's Central Bank Digital Currency (CBDC). It is just a matter of getting people used to it. As they got used to wearing Face Diapers. To being fondled as a condition of travel. To election months rather than election day. And so many other such things. *All in good time, my pretty, the wicked witch says.*"

WHATS NEXT?

One World Currency

<https://www.youtube.com/watch?v=mvPOnYHZLN8>

A one-world currency to globalists like Klaus Schwab. It is a utopia but to everyday freedom-loving, regular people. It sounds like a nightmare from hell. But is this something to be feared? What if the future has one currency that everybody uses in-store? Well, in this video, I am going to show you why. Number one, that future is not only inevitable but number two, it is not something that needs to be fearful. It just depends on the type of money that ends up being the money for everybody."

[Tucker Not Actually Fired? ...per Megyn Kelly](#)

Allow me to explain...

Is Tucker Carlson actually NOT fired?

Well, Megyn Kelly explains that he's not fired at all.

In fact, she says according to her sources he is still under contract.

What Fox News did, according to Kelly, is took Tucker off the air, fired his staff and took away his access to his corporate email.

But they didn't "fire him".

They didn't terminate his contract.

Again this is all according to Kelly, who is a decent reporter even if she did have a very strange left-turn a few years back.

So...what does this mean and why split hairs?

It's real simple.

If he's still under contract and if they are still paying him, they don't have to air his show.

And if they keep him under contract and keep paying him, then he still has a non-compete and can't go to a different company or start a podcast or do anything.
